

# Kilop Kover

Acoustical Insulation Solutions offered by Kilop USA, Inc

***NOISE POLLUTION IS DEFINED AS INTRUSIVE NOISE THAT DISRUPTS, DISTRACTS, OR DETRACTS FROM REGULAR FUNCTIONING.***

*Long-term exposure to high levels of occupational noise is associated with increased rates of high blood pressure and other cardiovascular health problems.*

~ ~ ~

***Traffic*** is a significant contributor to noise pollution and stress. While it'd be impossible to promise traffic free trucking lanes, we can help create a less stressful environment for drivers. ***How?***

*Healthy drivers are Safe drivers*

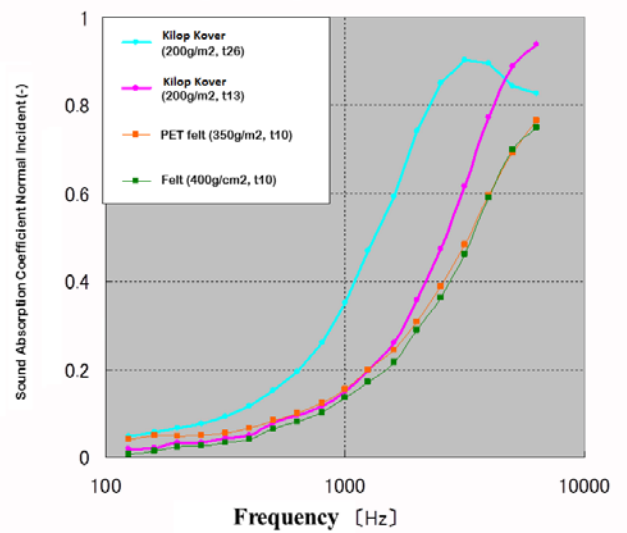

*Kilop Kover is currently used in noise dampening applications in many markets (Automotive, Constructions, etc.)*

~ ~ ~

*When tested against current acoustic insulation products, Kilop Kover performs much better!*

## Sound absorption performance contrast
